How ApeRove Works?

The Brand Applies a Secure Scratch Label

Each product receives a unique scratchable QR label printed by ApeRove. These labels are impossible to duplicate and linked to a verifiable NFT certificate on the blockchain.

The Customer Scans the Code

After purchasing the product, the customer scratches the label and scans the QR code using their phone — no app installation required.

Blockchain Verifies Authenticity

The scan connects to the ApeRove platform, which instantly verifies the product on-chain. A smart contract ensures it's the first and only claim of that item.

The Customer Receives Their Reward

Once verified, the customer is:

- Issued an NFT as a digital certificate of originality
- Rewarded with cashback or entered into a jackpot lottery instantly
- Invited to store the NFT in their ApeRove wallet or another compatible Web3 wallet

- **Authenticity**
- **Cashback Rewards**
- **Jackpot Lottery**

Value Your Customers

Original Products

At ApeRove, we believe authenticity is more than a promise — it's a proof. In a world flooded with counterfeit goods, diminishing consumer trust, and growing demand for transparency, we've built a platform that empowers brands to verify their originality and reward their customers in a whole new way.

Blockchain Certified

Using cutting-edge blockchain technology, ApeRove transforms every product into a digital experience — where a simple scan connects buyers to a tamper-proof certificate of authenticity in the form of an NFT. But we don't stop there.

Instant Cashback Rewards & Jackpot Lottery

We turn the act of buying into an engaging journey. With instant cashback rewards and a built-in lottery system, we give consumers more than just a product — we give them excitement, ownership, and value.

Cashback & Lottery System

Turn Every Purchase Into a Rewarding Experience

ApeRove doesn't just verify originality — it adds excitement to every purchase. With our built-in cashback and lottery system, customers are instantly rewarded for buying authentic products.

Cashback

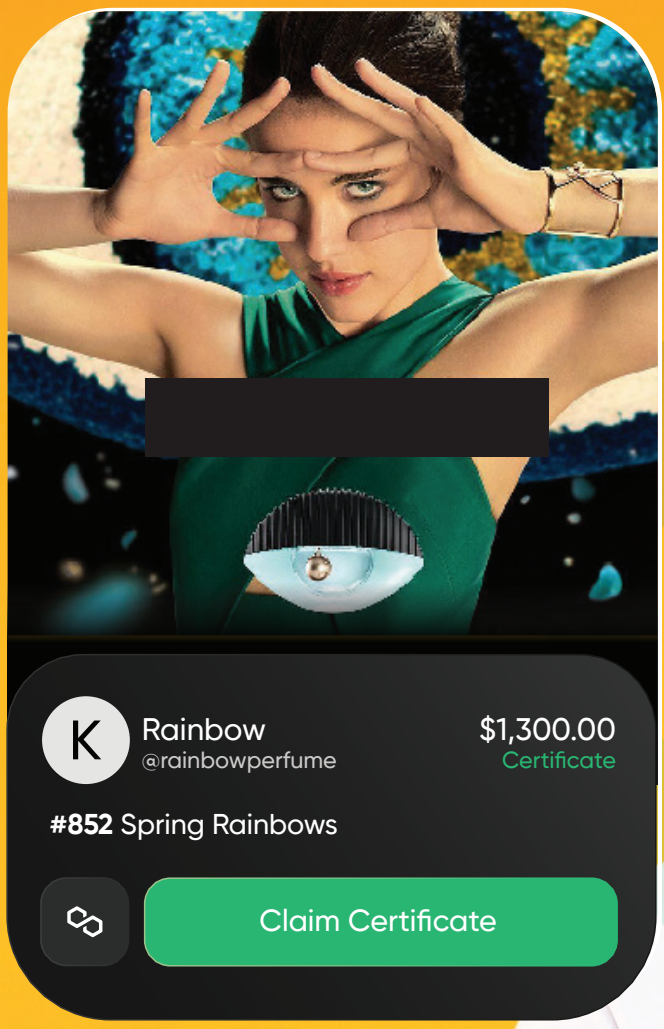
Each product comes with a pre-defined cashback amount.
Once the buyer scans and claims the product, the reward is unlocked and visible in their ApeRove wallet.

- Cashback can be sent directly in tokens
- Adjustable per product or campaign
- Drives customer satisfaction and brand loyalty

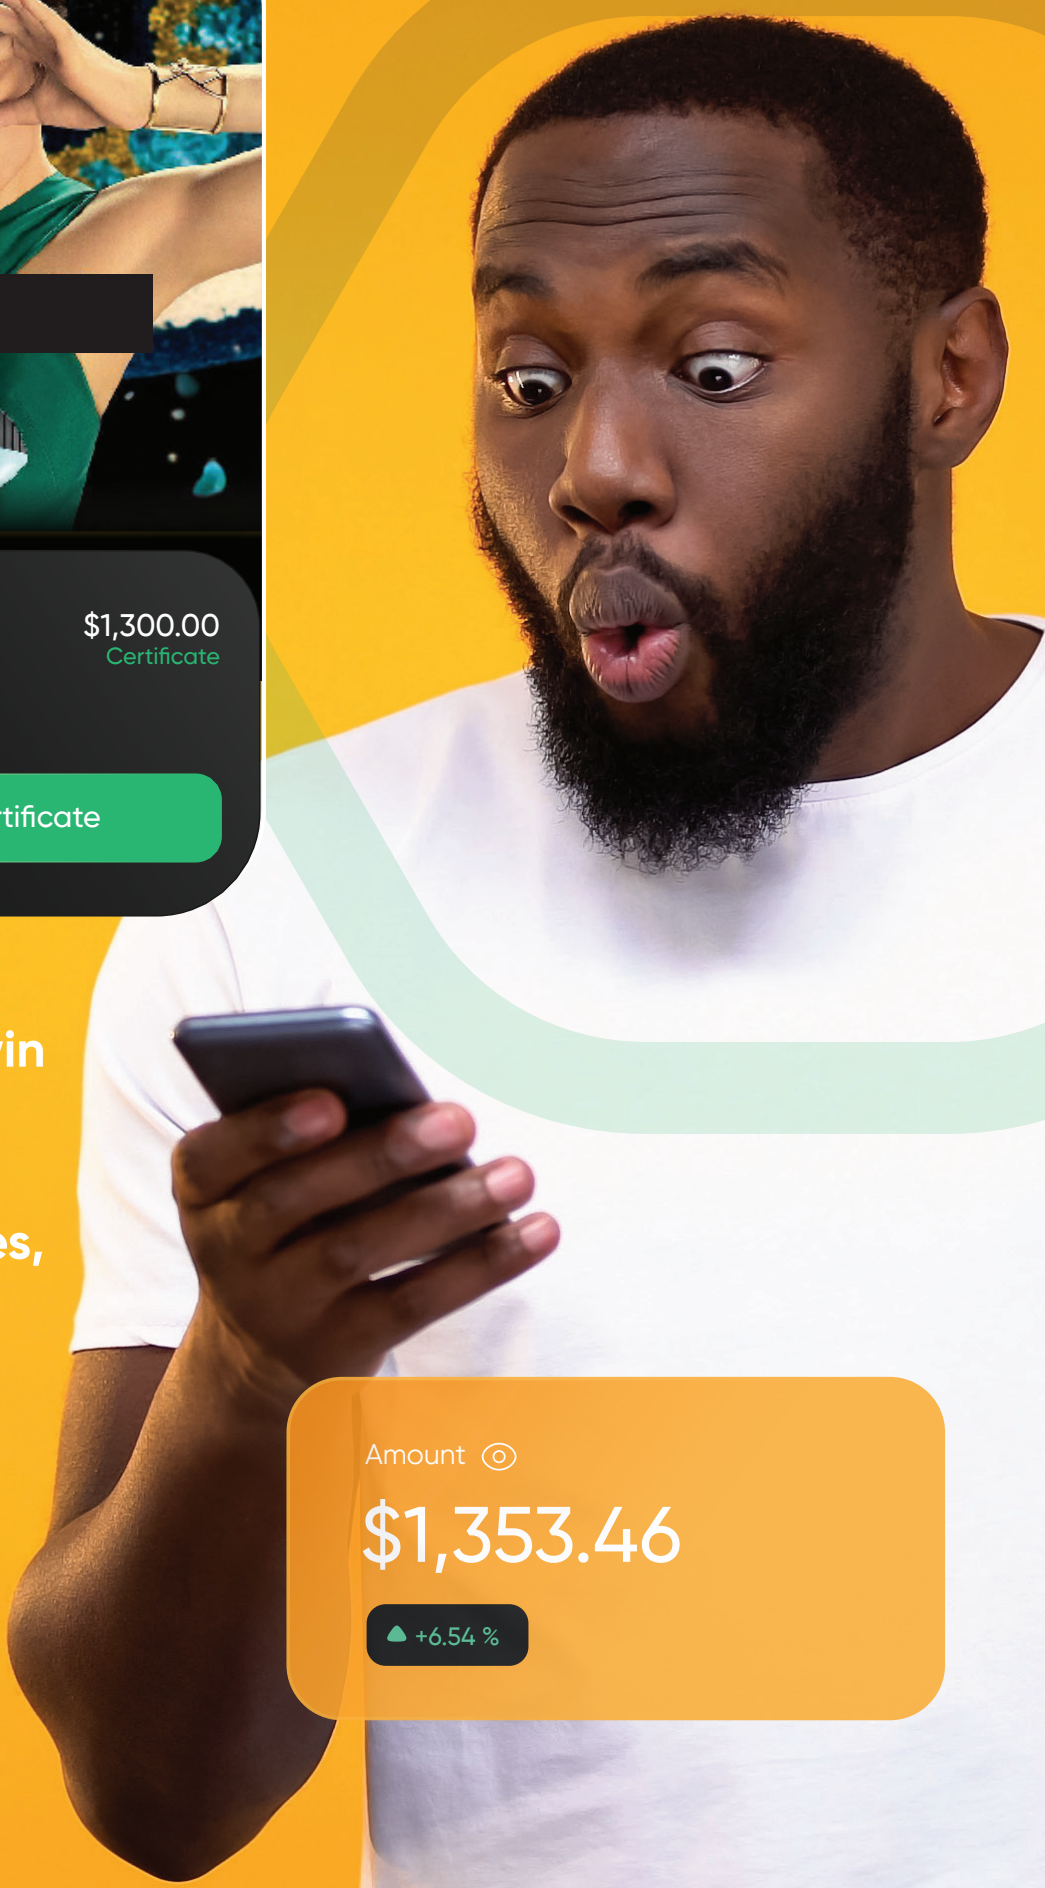
Jackpot Lottery

Some products include jackpot NFTs — randomly assigned during scan. These lucky NFTs offer larger rewards or special gifts.

- Increases customer engagement
- Creates buzz and viral sharing
- Brands can define the number of jackpot winners and prize values

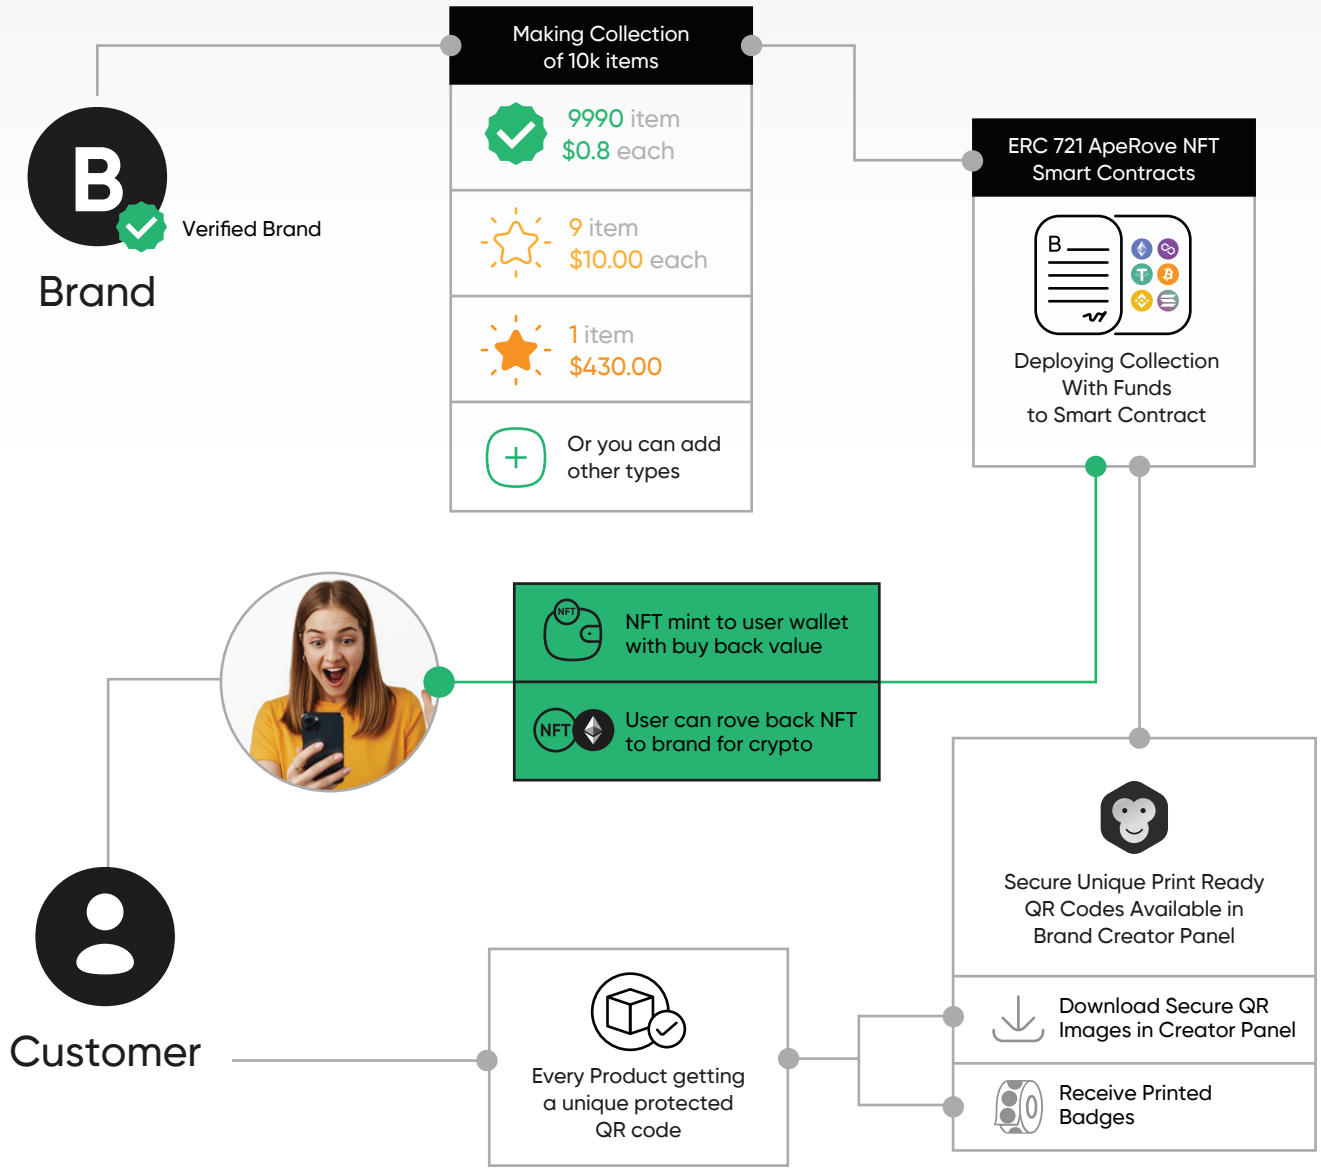


The chance to win a jackpot drives impulse buys, repeat purchases, and viral word-of-mouth.



ApeRove

Certification Process



Simplfied process for seamless user experience

User dont need to pay for gas prices, or have any blockchain knowledge

Transparent Proccess

Blockchain secured & transparent proccess with destributed ledger technology

Professional Support

Reliable, expert assistance to ensure seamless setup, smooth operation, and ongoing success

Starting From 29$ Monthly

Up to 1 in 4
products sold on major shops are fake

Trust for Online Shops & Retails

ApeRove integrates directly with your online store. After a customer makes a purchase, our system automatically generates a unique NFT Certificate of Authenticity and sends it straight to their email. This digital certificate lives on the blockchain, proving the originality of the product for life — and giving your customers confidence in every order they place plus with cashback rewards and lotteries.

Are They Talking About Your Brand?

ApeRove

Fame isn't bought — it's built on trust, originality, and community.

Trust & Originality

Fame doesn't come from advertising alone. It comes when customers trust that a brand's products are authentic. A product that can be confidently proven original — with transparency and blockchain verification — becomes more than a purchase, it becomes a statement.

Consistency of Experience

A famous brand is one that keeps its promise every time. Quality, design, service — when these are delivered consistently, customers begin to spread the word themselves.

Storytelling & Community

Fame is amplified when people feel part of something larger. Storytelling, cultural connection, and communities around the brand create emotional attachment, which drives organic growth in recognition.

Visibility & Transparency

Today, fame doesn't grow behind closed doors. Brands that openly show their originality certificates, their sustainability efforts, and their engagement with customers are the ones that rise above the noise.

Fame

The Future Belongs to Brands That Build Communities With Their Customers
